

Coronavirus Impact at Savillex Customer Communication

Categorized as an Essential Critical Supplier by the state of Minnesota, Savillex has been operating continuously throughout the Coronavirus crisis. In doing so, we have implemented a series of actions to protect our employees, the local community, and our customers.

Employee Protection

Savillex is following Minnesota Governor's Executive order 20-8, requiring employees to wear masks at all times while in Savillex facilities. We've implemented deep cleaning protocols for common areas within our facilities and encourage all employees to follow best practices regarding hygiene and social distancing. We also eliminated face to face internal meetings, visitors and all business travel.

Supply Continuity

We maintain regular contact with our critical raw material suppliers and do not anticipate a disruption to the supply of our products, as far as our ability to manufacture them. We want to assure our customers that we are committed to working through this situation by protecting our workforce and our raw material supply. Should conditions change we will provide further updates.

Regards,
