## PURILLEX® 2D BAGS

*Flexible, validated assemblies that move fluids safely and consistently*

### **Purity. Reliability. Confidence.**

- High-purity 2D bag assemblies for bioprocess confidence
- Leak-resistant, reliable performance
- Flexible, durable film construction
- Ideal for media, buffers, and critical fluids
- Consistent quality, assembly after assembly

### **Validations:**

USP <788> – low particulates

USP <85> – Supports bacterial endotoxin control requirements

USP <661.1>/<661.2> – Suitable for plastic pharmaceutical packaging systems

Temperature-rated to –40 °C

**Savillex**
